What's the minimum set services that I would need here, If I need to host a simple 1 page html site. As a learning

01:00 pm

A: You have multiple options.

1. Create an App Service and host your html page there.
<https://azure.microsoft.com/en-us/services/app-service/>
2. Alternatively, because you have a static page, you can host it in an Azure Blob Storage container. See this
<https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-static-website>

Good luck!
