

Az-900-questions January 2023 - Session 02

Questions:

#	Name	Company	Question	Priority
26	K H		What is the difference between Azure Stack and Azure Arc?	
20	. .		Do you think the practice questions and materials from your AZ-900 certification course are enough to ace the exam? Thank you.	
4	N M		is not Vnet peering go through public internet?	

Answers:

- 4: No. "Network traffic between peered virtual networks is private. Traffic between the virtual networks is kept on the Microsoft backbone network."
 - <https://learn.microsoft.com/en-us/azure/virtual-network/virtual-network-peering-overview>
- 20: You'll have a good chance of passing AZ-900 if you go through:
 - The two sessions we had today and yesterday. Please refer to the recordings if needed.
 - Go through the demos in the following on-demand video course:
 - <https://learning.oreilly.com/videos/microsoft-azure-fundamentals/0636920797234/>
 - Go through all the links in the slide deck
- 26: Azure Arc enables you to manage your existing on-prem recourse from a single portal in Azure. Azure Stack allows you to modernize your on-prem infrastructure by running Azure services on local infrastructure.
 - Azure Arc: <https://learn.microsoft.com/en-us/azure/azure-arc/overview>
 - Azure Stack: <https://learn.microsoft.com/en-us/azure-stack/operator/azure-stack-overview>

Thank you!
